ABOUT ME

Highly motivated, organized, detail-oriented person, able to meet rigorous performance standards and demanding schedules.

I am a problem solver that finds solutions through the creative process of design.

I believe in the ability of architecture and research to constantly improve our environment.

OBJECTIVE

Looking for an internship position to bring to life my passion for architecture and to learn and understand how the profession works.

USA - 2019
Finland - 2012, 2020

This building consists of 4 sections. In addition to residential apartments, the project includes some commercial premises on the ground floor. The number of small-sized apartments is designed taking into account the modern view on the organization of living space. The structure is composed of the wall panels. The floor

standart floor plan 1:1000

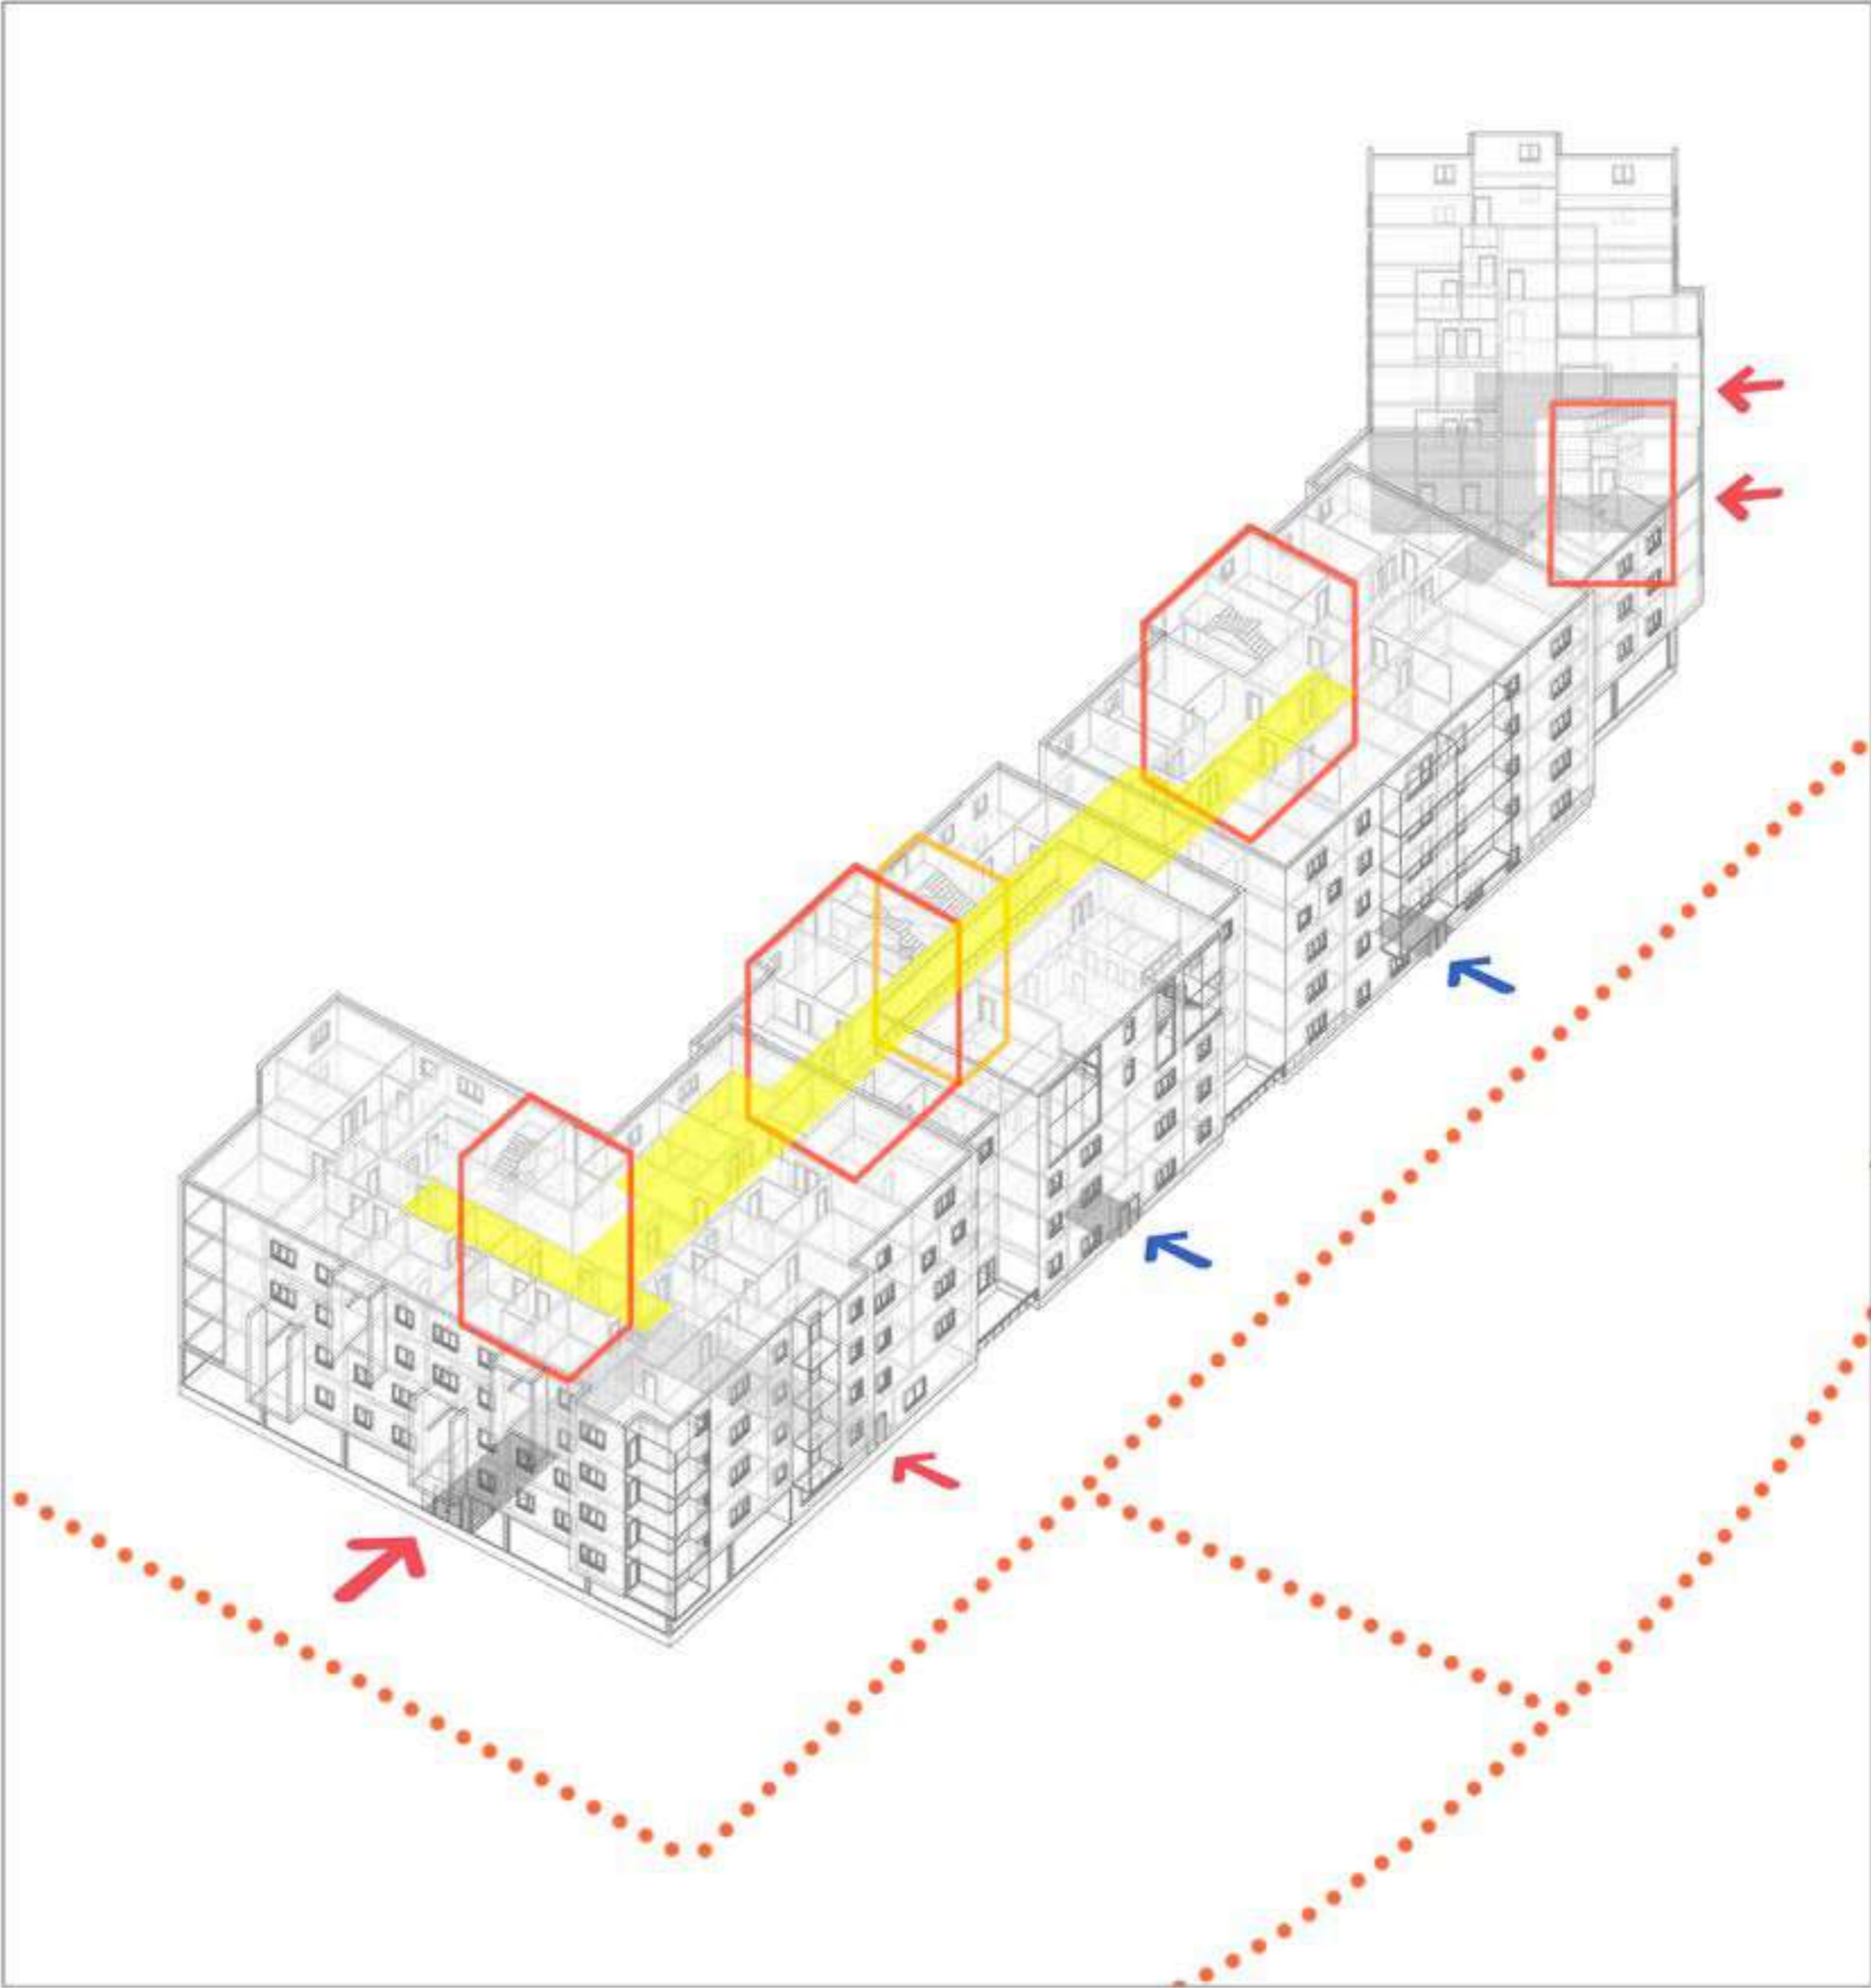

SECTIONAL RESIDENTIAL BUILDING 2

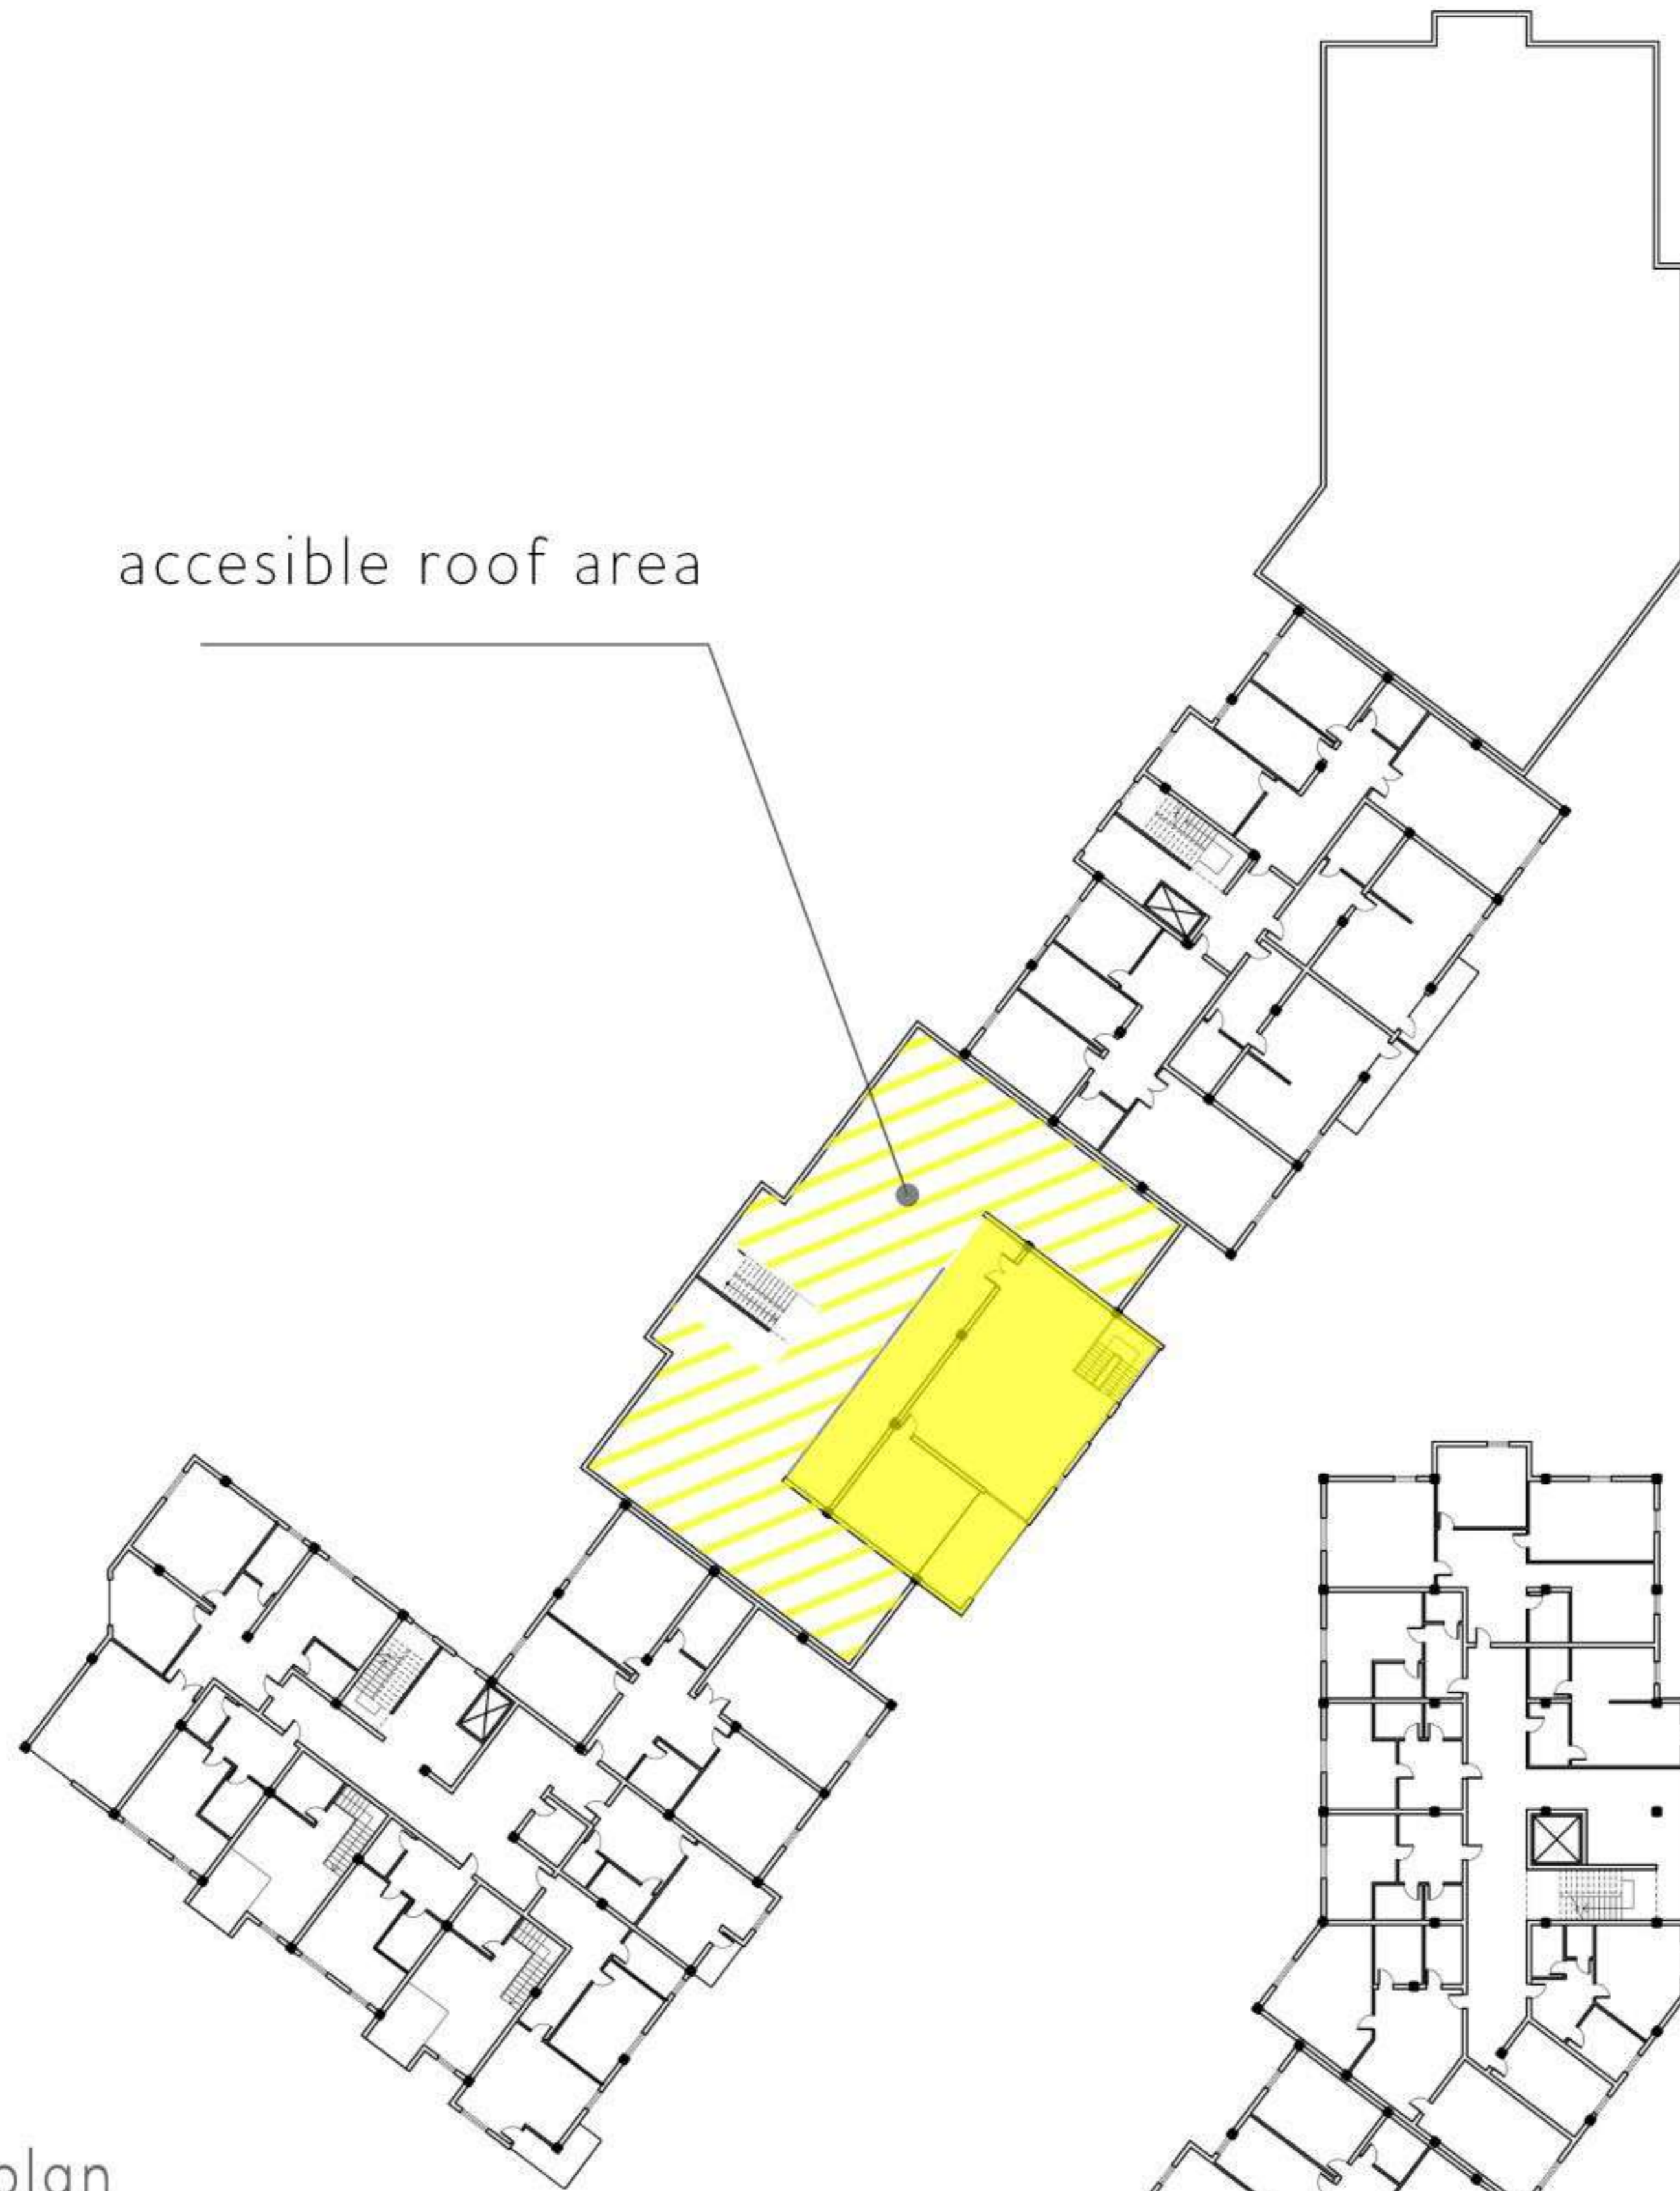

This project includes 3 sections for permanent residence and apart hotel. The ground floor is for public spaces. In addition to general landscaping there are separate entrances and parkings for several apartments. The main supporting units here are columns (the structural axis grid is 6x6 meters).

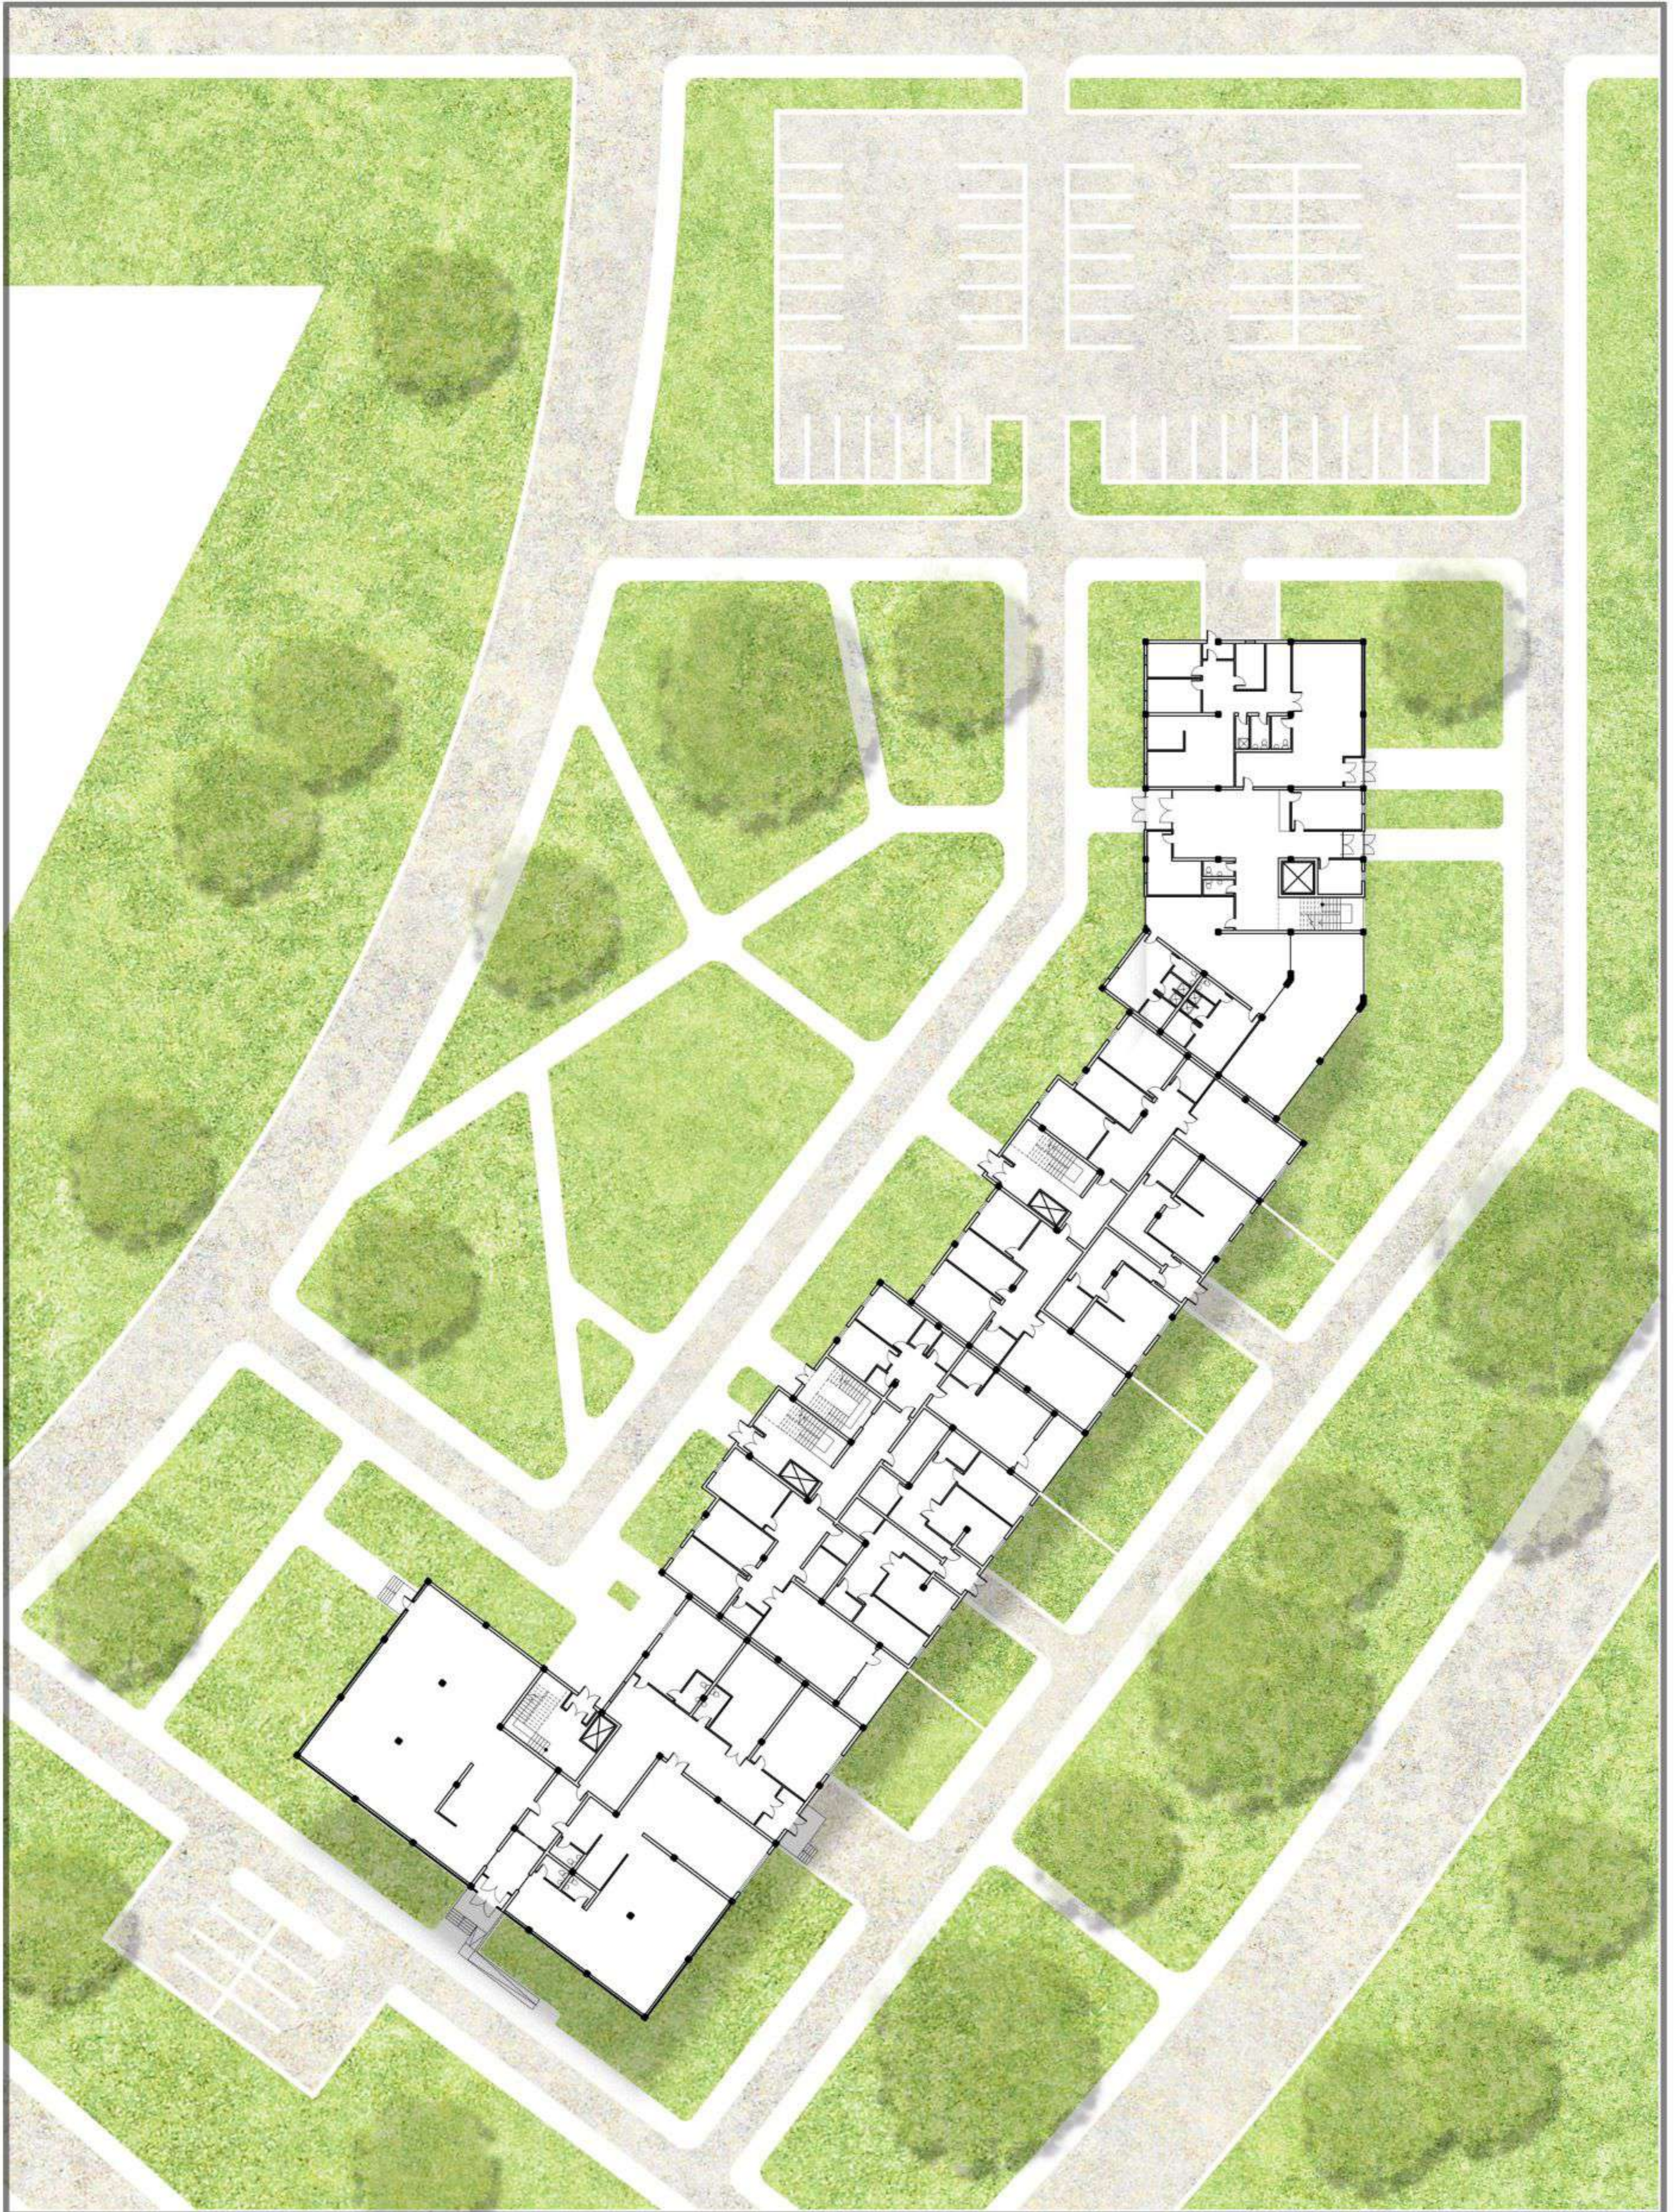

- external driveways
- the main staircases
- evacuation staircase
- public entrances
- private intrances
- extended corridor on the 4th floor

INDIVIDUAL HOUSING

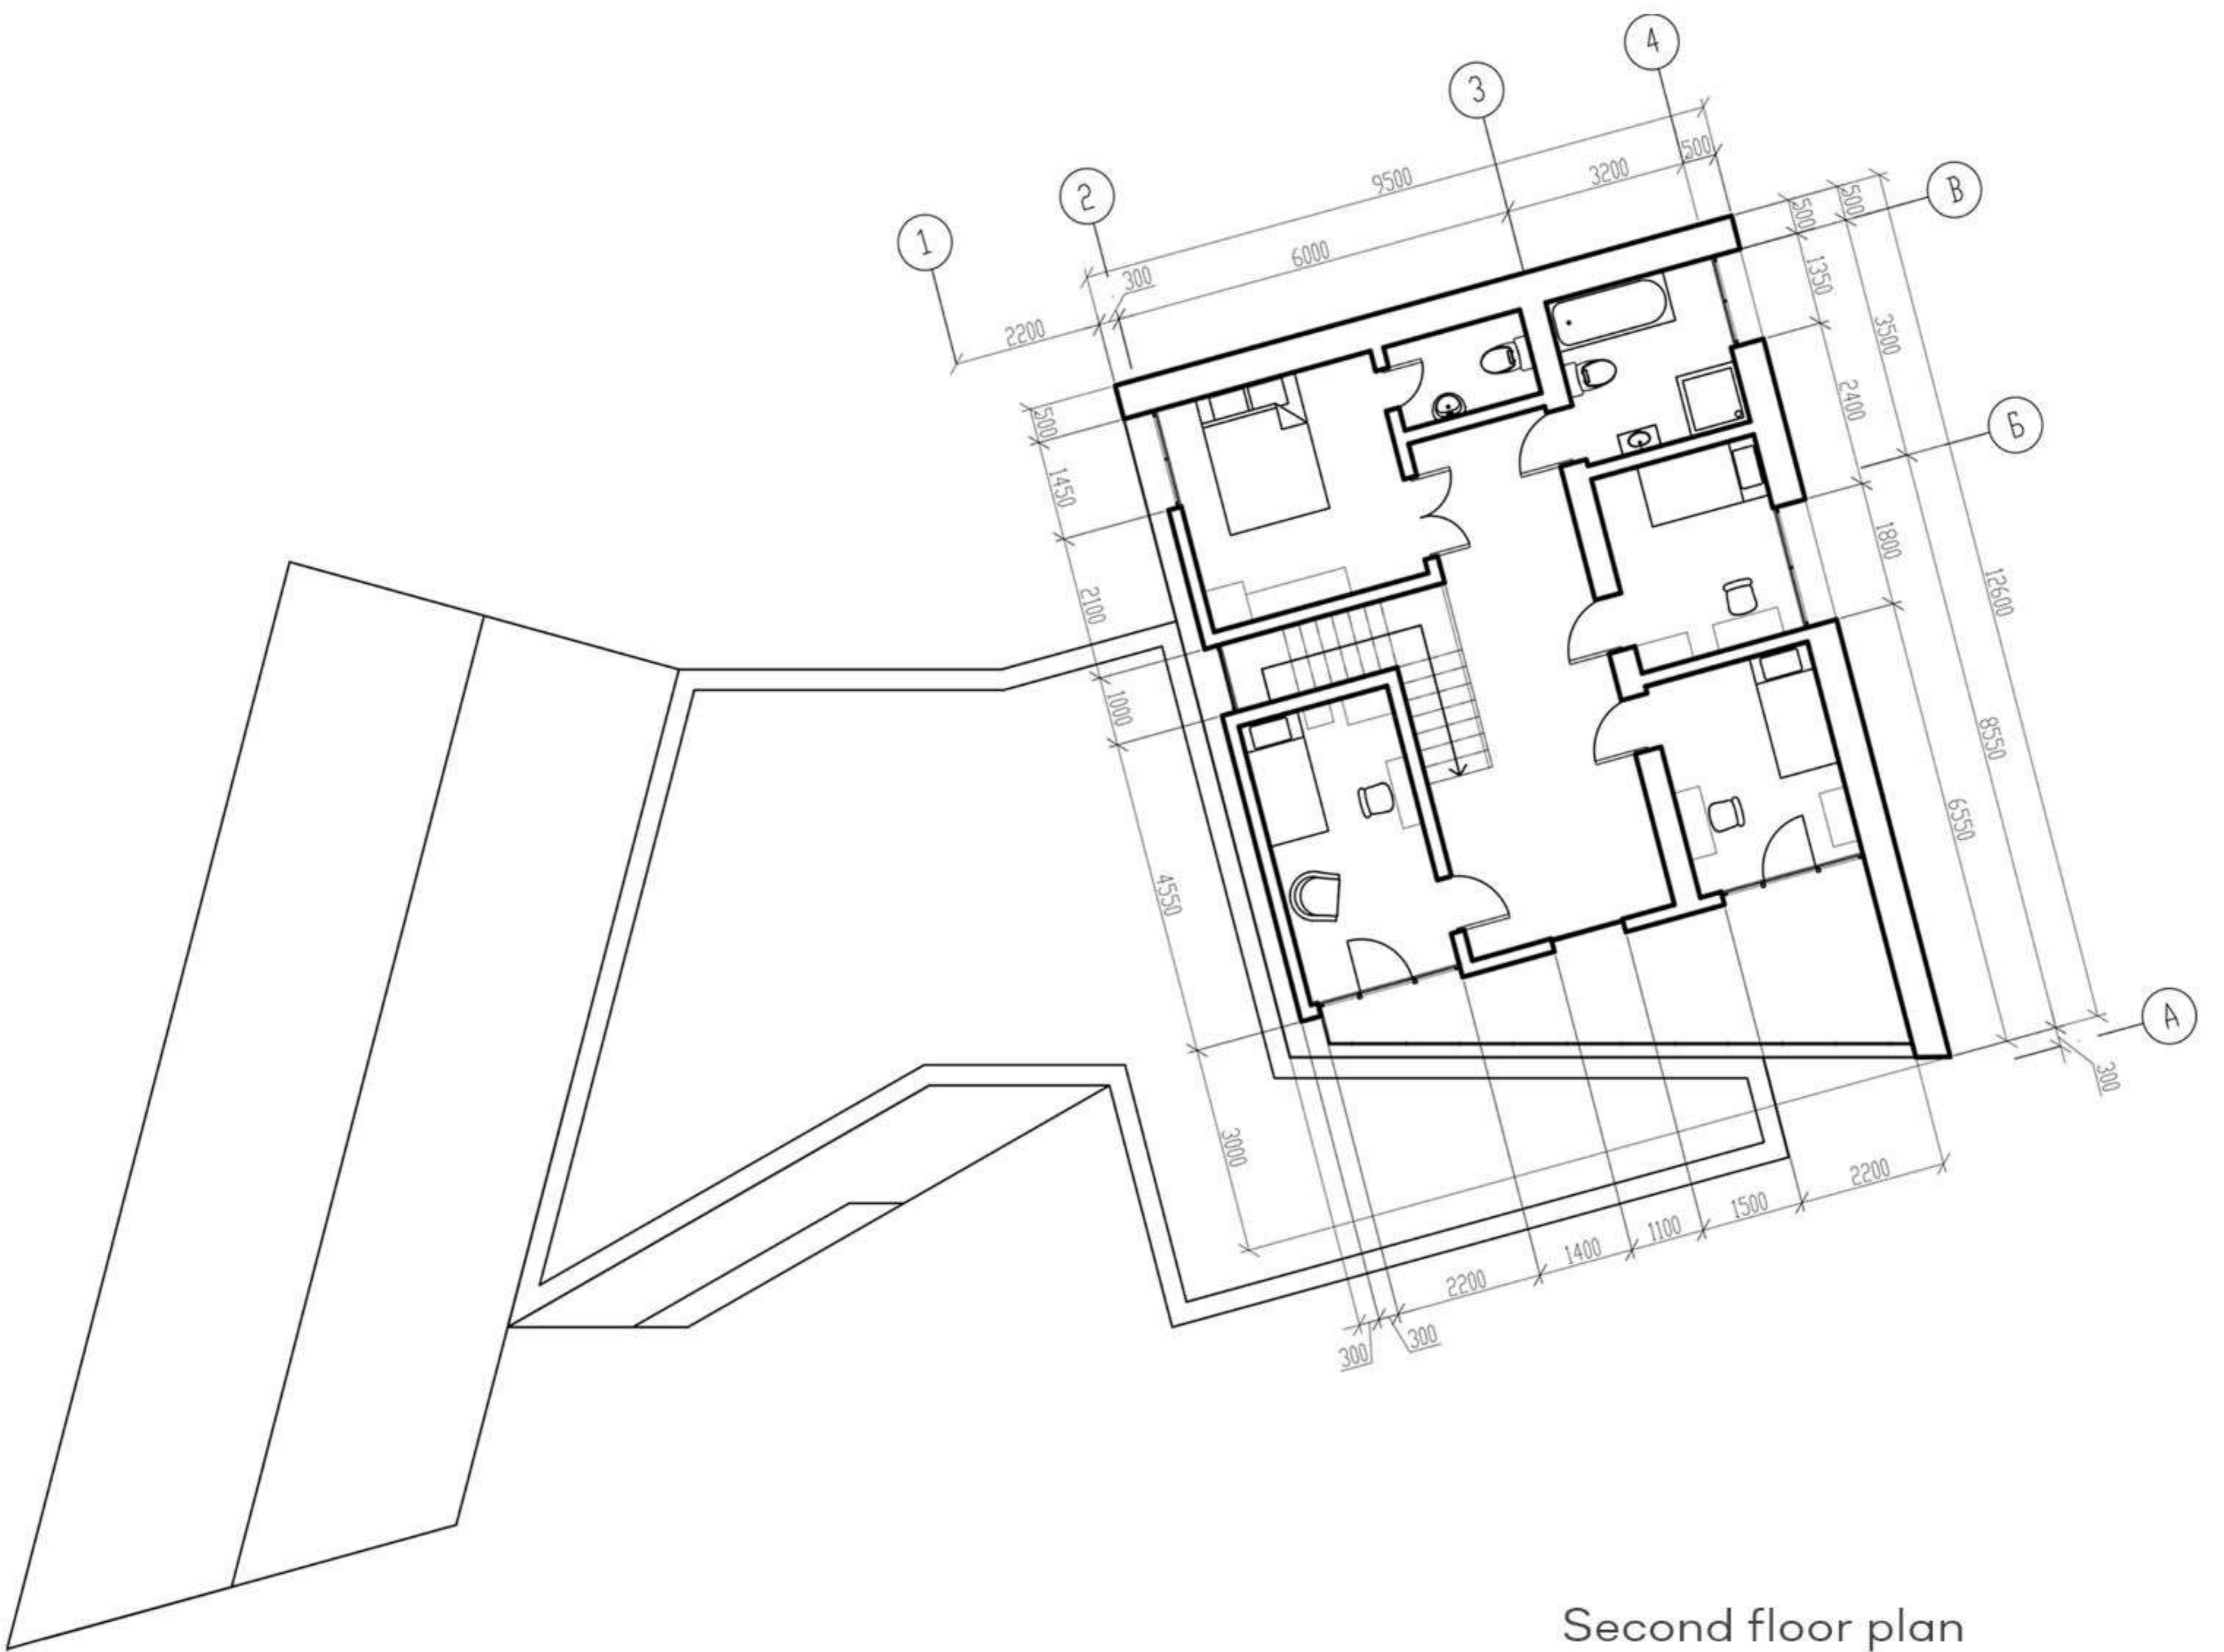

Only the coordinated interaction of all elements - space, outer shell, interior, natural landscape - form the overall impression of a residential property.

Second floor plan

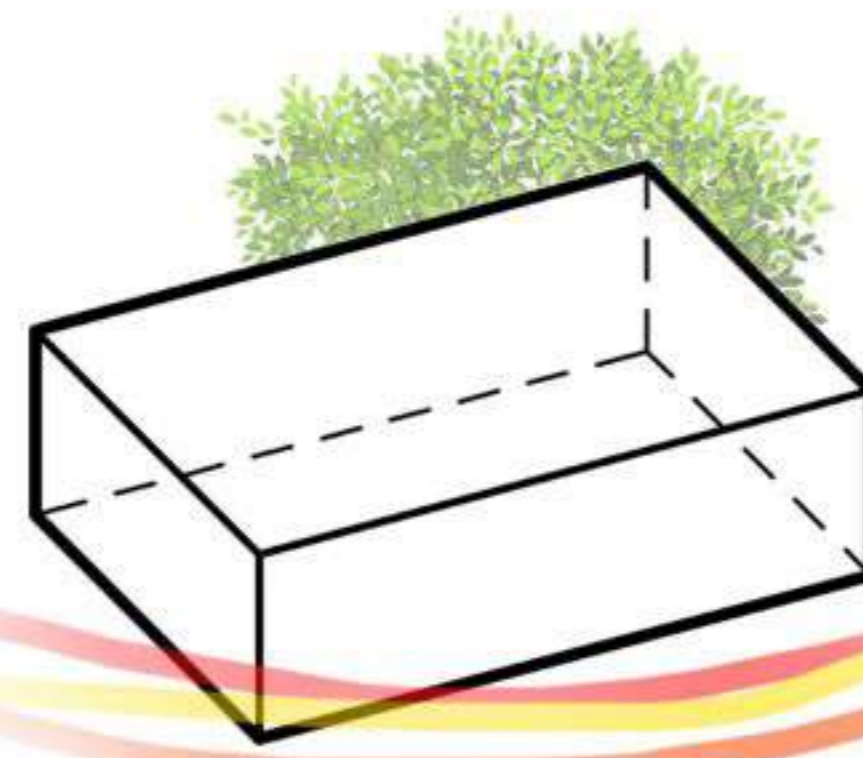

SUMMER PAVILION

The shape of the pavilion is determined by the relief; there will be benches at the place of elevation. The pavilion combines two functional processes: here you can read a book and take coffee.
